

Hi Simon

The price for the job at the sports club is £23,400+VAT

The price has been slightly adjusted as we neglected to add on the price of the skips

The price includes:

- Stripping off existing eternit slates\*
- Stripping existing coroline sheets that are fixed underneath
- Lay breathable membrane and fix treated 25x50 fully graded battens to the roof
- Lay and fix tiles to battens, tiles to be used are Marley moderns
- Supply of scaffold
- Supply of skips and clearance of all debris from site

\*the eternit slates contain a small amount of asbestos, because of this extra care and extra precautions have to be undertaken as well as an outside contractor being brought in to remove the slates.

The above price does not include any insulation or supply of vent tiles for soil pipes and will all be an added extra if needed

Regards
